#### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

#### Status

- 1) Responsive to communication(s) filed on \_\_\_\_.

Art Unit: 1641

**1)** In the last line of claim 14, the term "L" should apparently be "E" (see claim 22).

**2)** Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The claims are directed to inventions which involve chemically and functionally diverse reagents generically defined as "H-E-L", methods for the use of these reagents and products containing the reagents.

The inventions listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the inventions lack the same or corresponding special technical features for the following reasons:

Each separate combination of the variables "H", "E" and "L" which define the reagent "H-E-L" is chemically and functionally distinct from the other combinations of these variables. For example, each of the species of "H-E-L" depicted in claims 28-31 constitutes a separate invention. Clearly, a reference which would anticipate or render obvious the reagent "H-E-L" defined as "H" = Cu-IDA, "E" = alkylene and "L" = "Ar<sub>2</sub>" would not render obvious the reagent "H-E-L" defined as "H" = formula (5) of claim 31, "E" = PEG and "L" = C<sub>20</sub> lipid. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring divergent fields of search in both the patent and technical literature, restriction for examination purposes as indicated is proper. For examples of diverse classification: the reagent of claim 28 is classified in class 562, the reagent of claim 29 is classified in class 564 and the reagent of claim 30 is classified in class 548.

**3)** In accordance with 37 CFR 1.499, applicants are required, in reply to this action, to elect a single invention to which the claims must be restricted.

Art Unit: 1641

**4)** Applicants are reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

**5)** Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mary (Molly) E. Ceperley whose telephone number is (571) 272-0813. The examiner can normally be reached on 7:30 a.m. - 4:00 p.m..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Long V. Le can be reached on (571) 272-0823. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
